FACADE SPACER

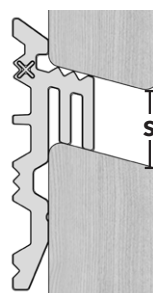

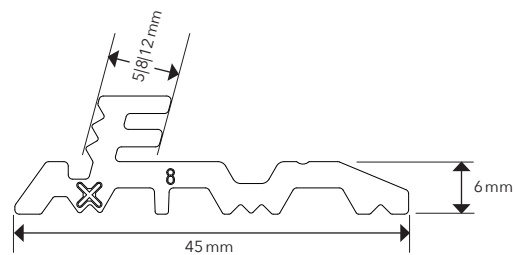

The **FUGO** Facade Spacer is the perfect accessory for visibly fixing rhombus cladding profiles made of wood or wood-like materials.

The specially shaped joint spacers between the individual rhombus profiles create a uniform shadow gap and ensure the perfect look for wooden facades, privacy screens, fences, etc.

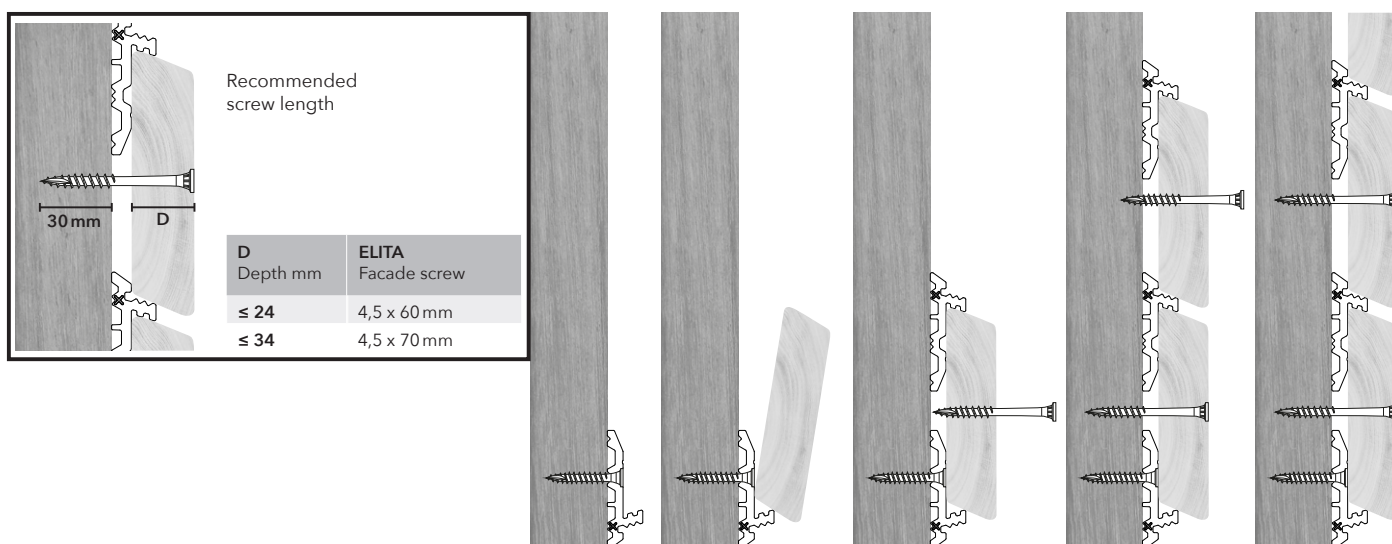

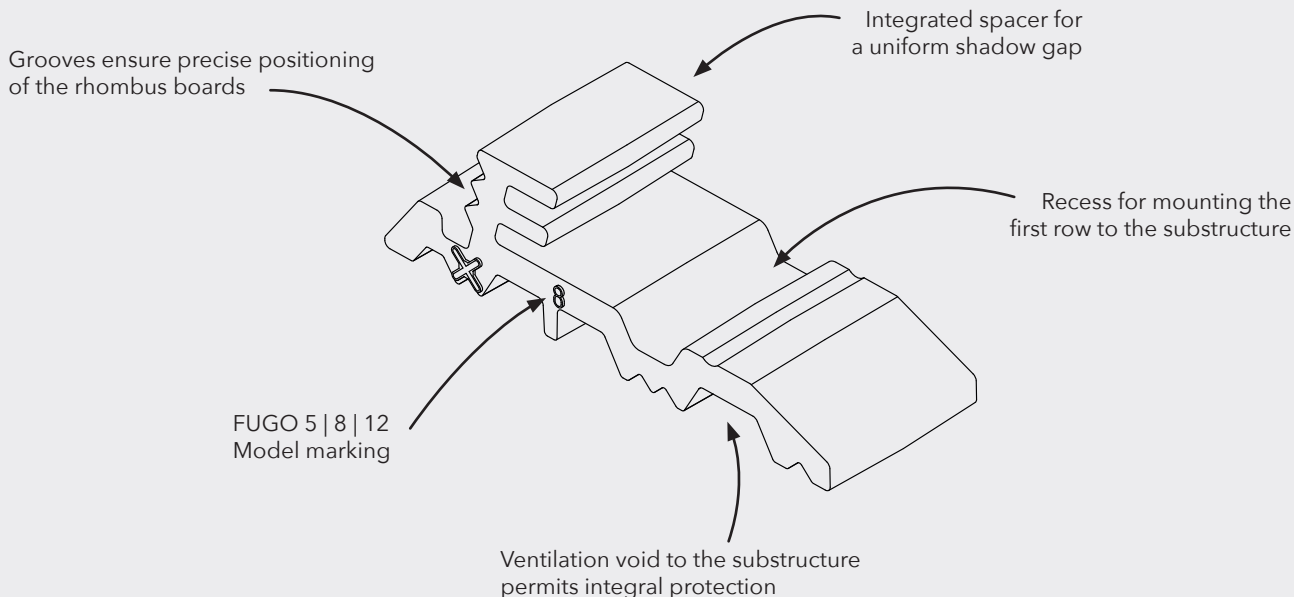

Thanks to the integrated grooves on the spacer, rhombus boards can be easily and quickly positioned and secured.

A space of 6mm creates a ventilation void to the substructure and prevents the formation of waterlogging.
